

QUESTIONS TO CONSIDER WHEN BUILDING YOUR BYOD POLICY

1

COMPANY POLICY

What is your company policy on accessing the network from a personal device?

2

SECURITY

Do all employees (and devices) need the same security level and restrictions?

3

IMPORTANCE

Which data is critical and must be protected?

4

EXTRA SECURITY

Do you want to implement extra security on company data like email and calendars?

5

PREVENTATIVE

What is the employee's personal liability associated with the use of a personal device on the network?

6

RESTRICTIONS

Do you want to impose hardware and software restrictions inside and/or outside the office?

7

RAMIFICATIONS

What are the ramifications of a lost or stolen device that contains company or customer information?

8

EXPECTATIONS

Have you created and communicated your Acceptable Use Policy pertaining to the use of personal devices on the network?

9

SUPPORT

If you allow personal devices, which devices do you want to support?

Need help building a BYOD policy? Let us help you put a policy in place to protect your data.
